Trading in CFDs on cryptocurrencies with X GLOBAL Markets LTD

- i. A number of risks are associated with CFDs on cryptocurrencies. We advise clients to read the Risk Notice that can be found here: <https://www.xglobalmarkets.com/legal/>.
- ii. CFDs on cryptocurrencies are complex and high risk and as such come with a high risk of losing all the invested capital.
- iii. Cryptocurrencies values can widely fluctuate (there can be extremely high volatility) and may result in significant loss over a short period of time.
- iv. CFDs on cryptocurrencies are not appropriate for all investors and therefore, investors should not trade in such products if they don't have the necessary knowledge and expertise in this specific product; they should always be fully aware and understand the specific characteristics and risks related to these products.
- v. CFDs on cryptocurrencies are offered with nightly roll-over fees so it costs money to hold open positions. These fees are charged due to the fact leverage is offered (which incurs interest) and also because there are costs associated with handling physical cryptocurrencies (which CFD positions are ultimately covered with).
